HGE Energy Storage 3 LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On September 27, 2022, HGE Energy Storage LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Fort Ross Pumped Storage Project to be located in Sonoma County, California, adjacent to the Pacific Ocean, approximately 1.5 miles northwest of Fort Ross State Historic Park. The sole purpose of a preliminary permit is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The pumped storage hydropower project will consist of: (1) a new upper reservoir with a surface area of 23 acres and a storage volume of 5,600 acre-feet at a maximum water-surface elevation of 1,500 feet mean sea level; (2) a 12,000 foot-long, 10-foot-diameter steel-lined conduit that connects the reservoir to the powerhouse; (3) a 250-foot-long, 30-foot-wide, 100-foot-high, steel-reinforced concrete powerhouse constructed 100 feet below ground level, with five 250-megawatt (MW) reversible variable-speed pump-turbines, with a combined installed capacity of 1,250– MW that discharge into the Pacific Ocean; (4) a 100-foot-high, 30-foot-wide vertical access tunnel from ground level to the powerhouse; (5) a vertical intake structure and breakwater of undetermined size and design to lead from the tailrace to the powerhouse and to dissipate discharge energy; (6) a 500-foot-long, 250-foot-wide concrete-lined tailrace; and (7) a 0.5-mile-long, 69-kilovolt line extending from the powerhouse to a planned AC–DC converter station. The estimated annual energy production of the project would be approximately 3,714,406 megawatt-hours.
