

North Coast Watershed Assessment Program

**Gualala River
Watershed
Assessment Report**

March, 2003

State of California
Governor, Gray Davis

California Resources Agency
Secretary, Mary D. Nichols

California Environmental Protection Agency
Secretary, Winston H. Hickox

North Coast Watershed Assessment Program Participants

Contributing Agencies and Departments

Department of Fish and Game
Director, Robert C. Hight

State Water Resources Control Board
Chair, Art Baggett

Department of Forestry and Fire Protection
Director, Andrea E. Tuttle

North Coast Regional Water Quality Control
Board, Executive Officer, Susan A. Warner

Department of Water Resources
Director, Thomas M. Hannigan

Department of Conservation
Director, Darryl W. Young

In partnership with:

Institute for Fisheries Resources
Executive Director, William F. "Zeke" Grader
KRIS Project Director, William M. Kier

Gualala Assessment and Support Team

Fisheries:

Cynthia LeDoux-Bloom	California Department of Fish and Game
John Richardson	Pacific States Marine Fisheries Commission
Scott Downie	California Department of Fish and Game

Forestry and Land Use:

Donald Morse	California Department of Forestry and Fire Protection
Russell Henly, PhD.	California Department of Forestry and Fire Protection

Water Quality:

Robert Klamt, Team Lead

Ranjit Gill	North Coast Regional Water Quality Control Board
Bryan McFadin	North Coast Regional Water Quality Control Board

Hydrology:

John Clements	Department of Water Resources
Andy Corry	Department of Water Resources

Geology:

Michael Fuller, RG,CEG	Department of Conservation/California Geological Survey
Mary Scruggs, RG,CEG	Department of Conservation/California Geological Survey
Michael Purcell, RG	Department of Conservation/California Geological Survey
Wayne Haydon, RG, CEG	Department of Conservation/California Geological Survey
Stephen Sterling, CEG, CHG, RGp	Department of Conservation/California Geological Survey

Fluvial Geomorphology:

Kit Custis, RG, CEG and GHG	Department of Conservation/California Geological Survey
-----------------------------	---

Geographic Information System, Data Management, EMDS, and KRIS:

Steve Cannata	California Department of Fish and Game
John Carotta	Department of Conservation/California Geological Survey
Richard Fadness	North Coast Regional Water Quality Control Board
Chris Fischer	California Department of Forestry and Fire Protection
Patrick Higgins	Institute for Fishery Resources
Kevin Hunting	California Department of Fish and Game
Chris Keithley	California Department of Forestry and Fire Protection
Lisa Ohara	Department of Conservation/California Geological Survey
Peter Roffers	Department of Conservation/California Geological Survey
Sandra Summers	Department of Conservation/California Geological Survey
Jennifer Terwilliger	California Department of Fish and Game
Richard Walker, PhD.	California Department of Forestry and Fire Protection

Research and Documents Production:

Colette Schantz	North State Resources, Inc.
Dolores Padilla	Department of Conservation/California Geological Survey

Acknowledgments

The Gualala Assessment Team wishes to thank Henry Alden, Kathleen Morgan, and Doug Simmonds for their participation and thoughtful and constructive review of this document. We are also grateful to the Gualala River Watershed Council and Gualala Redwoods, Inc. for sharing data, assisting field crews, and encouragement. Limited historic and current information existed on the watershed prior to this assessment. We are especially grateful to the numerous landowners who granted access which enabled us to analyze current conditions and conduct the most accurate assessment possible. We particularly wish to thank the following for their considerable time and resources: Soper-Wheeler, James Holmes, Mr. and Mrs. Forget, Stan Wells, Pioneer Resources, Laurie Withey, Mendocino Redwood Company, Mike Jani, Chris Surfleet, David Milbrath, Nola Craig, and the Wickersham and Kelly Road Associations. Finally, we thank the field crew who collected the current data used in this assessment.

Accessing NCWAP Products

The North Coast Watershed Assessment Program produces a number of reports and other information products. This page provides a guide to what we produce and how to gain access to those products.

NCWAP Reports

NCWAP's main products are basin level assessment reports for each subject watershed. These reports consist of an integrative synthesis report and a number of discipline oriented appendices. A limited number of these synthesis reports and appendices were produced in printed media for program cooperators, stakeholder groups, and program partners. Printed reports were also distributed to most major libraries. Printed documents are not currently available to the public; however the entire synthesis report document, including appendices and maps, is available on a compact disk (CD) in PDF format or via the NCWAP website www.ncwatershed.ca.gov. The NCWAP watershed assessment reports are currently available for the Gualala River, Mattole River, and Redwood Creek watersheds. Other reports will become available over time. CDs containing the reports, appendices, and maps may be requested from:

California Department of Fish and Game
Wildlife and Habitat Data Analysis Branch
1807 13th Street, Suite 202
Sacramento, CA 95814
(916) 324-9265

Klamath Resource Information System CDs and Website

The Institute for Fisheries Resources (IFR) has produced Klamath Resource Information System (KRIS) projects for six North Coast watersheds. KRIS is a custom software program capable of managing watershed datasets, tables, charts, photos and maps. There are currently KRIS products for the Noyo, Big, Ten Mile, Gualala, and Mattole rivers, and Redwood Creek; they are available via the IFR website (www.krisweb.com). These products may also be requested on Compact Disc from:

Department of Forestry and Fire Protection
Fire and Resource Assessment Program
1920 20th Street
Sacramento, CA 95815
(916) 227-2651
frap@fire.ca.gov

Maps of Landslides and Relative Landslide Potential

The California Geological Survey has produced maps and GIS coverage of landslides and relative landslide potential. To order additional maps contact one of the California Geological Survey offices:

Publications Sales-Sacramento
(916) 445-6199 fax: (916)324-5644

Publications and Information Office-Sacramento
(916) 445-5716

Southern California Regional Office-Los Angeles
(213) 239-0878

Bay Area Regional Office-San Francisco
(415) 904-7707

You may also download the order form from the web site:
www.consrv.ca.gov/cgs/information/publications/ordering.htm

Datasets and GIS Products

NCWAP has produced a number of datasets and GIS products as a part of its work. These are available at the NCWAP website, www.ncwatershed.ca.gov
